

# 1

After printing this form, select the **Hearth Shape** from examples 1-6 below that best describes your hearth (looking down at the top) and fill in the requested measurements.

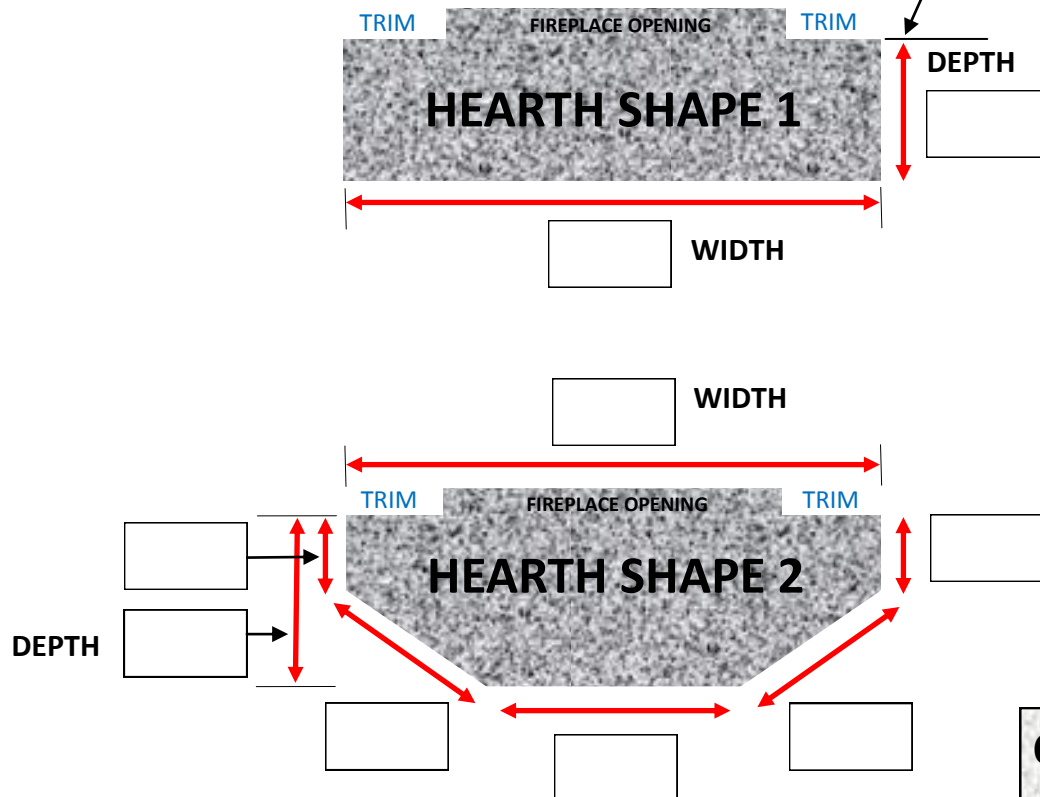

## TIPS

Carefully measure each distance indicated by a red arrow to the nearest 1/4 inch, and record the measurement **IN INCHES** in the associated box. **If you have a hearth with uneven stone**, allow for the distance between the two furthest points.

←→  
*example:*

Measure the **DEPTH** of the hearth from the front of the hearth backward to the fireplace wall.

**IMPORTANT:** If you have decorative trim molding extending down the front of the fireplace on either side of the opening, measure from the front of the stone backward only to the **FRONT** of the **Trim**, not all the way back to the fireplace opening.

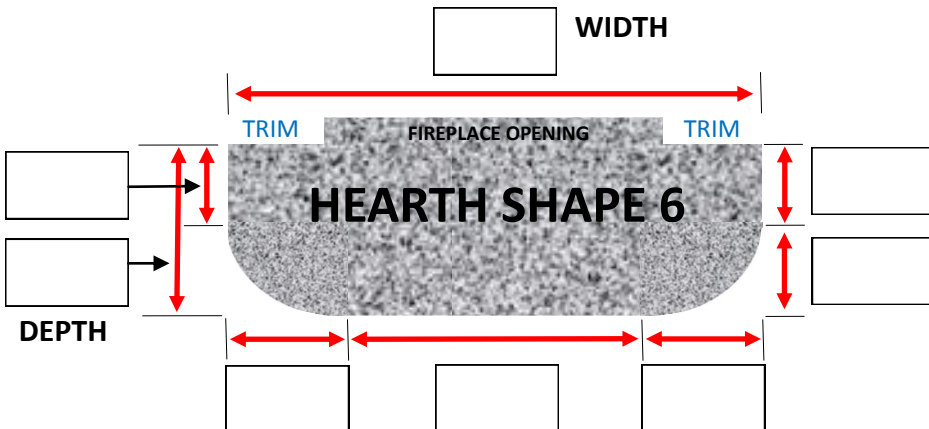

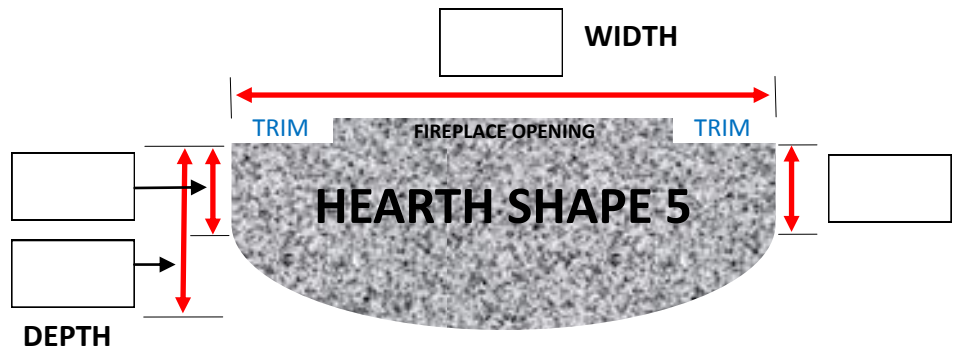

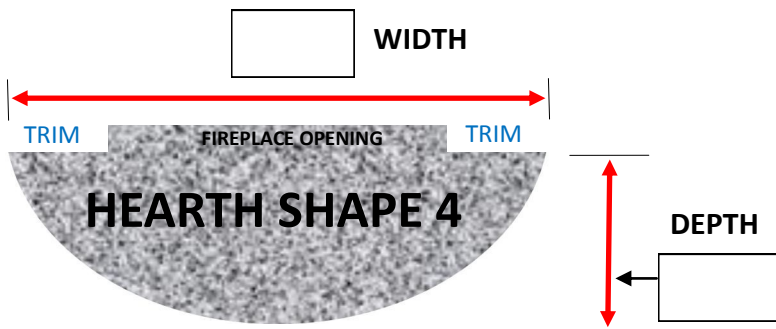

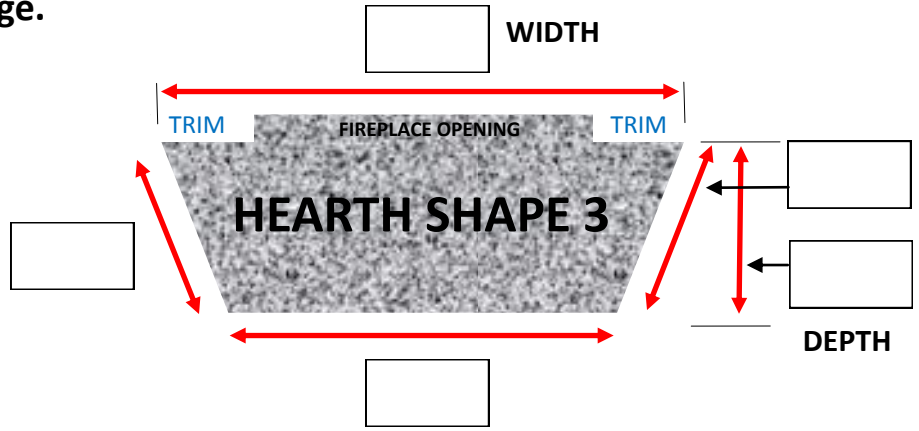

**CONTINUED ON  
NEXT PAGE**

1

Continued from prior page.

If your hearth has an unusual shape, to ensure a proper fit for your cushion we may request that you send us a picture, and possibly a paper template outlining the top portion of hearth.

Pictures may be sent to:  
**hearthcushion@preparefirst.com**

We have template paper available for sale if you should need it.

**2**

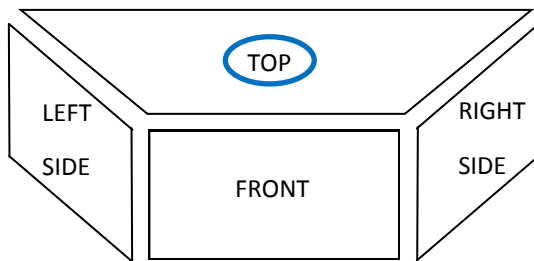

Measure the **HEIGHT** straight down from the top of the hearth to the floor, and write the measurement **IN INCHES** in the box provided.

**3**

Circle the area(s) of your hearth you wish to cover **AND** indicate your choice of fabric.

Circle all that apply:

Indicate Fabric Choice:

*example: NAVY*
